

Skills Are Invisible Until They Become a Business Problem

THE CHALLENGE

Organizations cannot make effective upskilling and workforce planning decisions because skills data is fragmented, outdated and difficult to trust.

- 1 Skills evolve rapidly**
Capabilities shift faster than systems can track.
- 2 Skill naming is inconsistent**
The same skill is labelled many ways.
- 3 Validation is difficult**
Self-reported skills lack verification.
- 4 Profiles become outdated**
Employee data decays within months.
- 5 Decisions become reactive**
Gaps surface only after they hurt.

WHERE VISIBILITY BREAKS

Who Experiences The Problem?

HRBP HR Business Partner

GOAL

Understand workforce readiness

PAIN POINT

No visibility into actual capabilities

L&D L&D Manager

GOAL

Create targeted learning plans

PAIN POINT

Cannot identify learning priorities

VP VP Talent

GOAL

Plan future workforce capability

PAIN POINT

Skills data cannot be trusted

KEY INSIGHTS

01

Most decisions are based on assumptions instead of verified skills.

02

Critical skill gaps are discovered too late.

03

Managers spend excessive time gathering data from multiple systems.

How Might We Make Skills Data Decision-Ready?

“How might we help HR leaders instantly understand skill health, workforce readiness and future gaps?”

01

Visibility

Make skills transparent across the organization.

02

Trust

Improve skill validation and confidence.

03

Actionability

Convert insights into clear recommendations.

Designing The Skills Intelligence Hub

WHY EACH MODULE EXISTS

Overview Dashboard

A single snapshot of organizational skill health.

Skills Inventory

A living catalogue of every skill across the workforce.

Skill Gap Analysis

Surfaces shortages against current and future needs.

Employee Profiles

Verified, up-to-date capability records per person.

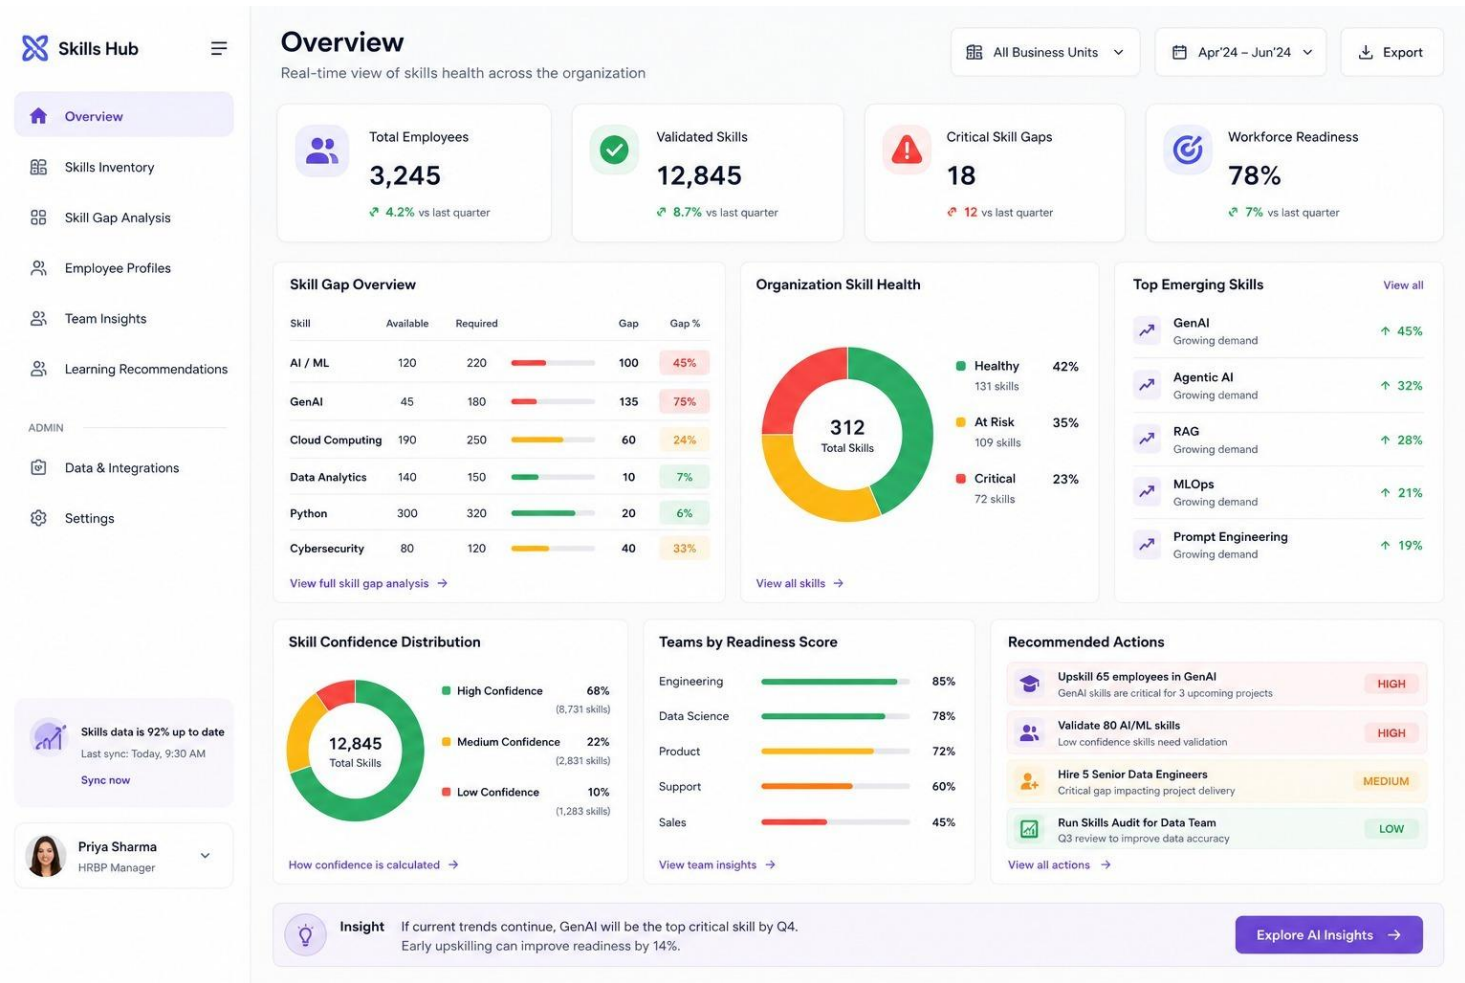

Team Insights

Compares readiness and gaps across departments.

Learning Recommendations

Turns gaps into targeted, assignable learning paths.

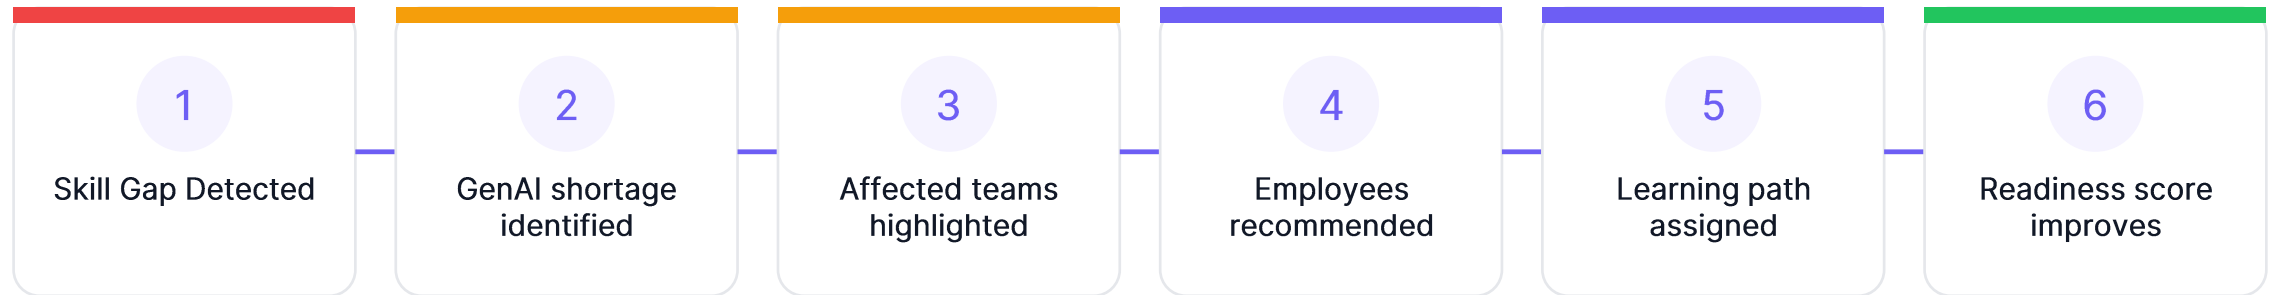

Skills Intelligence Hub Dashboard

6 KEY AREAS

- **Workforce Readiness Score**
Track overall preparedness at a glance
- **Critical Skill Gaps**
Prioritize hiring or upskilling
- **Skill Health Distribution**
Spot risk concentration early
- **Emerging Skills**
Invest ahead of demand
- **Department Readiness**
Target the weakest teams first
- **Recommended Actions**
Move from insight to execution

From Insight To Action

BEFORE
